STORM RAGES AT BOARD OF TRADE SESSION

Options is Divided in Regard to the Board's Responsibility for Payment of Irrigation Project

Long and protracted debate featured the regular Board of Trade meeting held in the Hunter Hotel last Wednesday noon, September 25th. The debate arose out of the motion by H. O. Bredin that the sum of \$5000 be taken from the funds of the board and turned over to the town council as a further payment on the cost of the town irrigation system.

At the previous board meeting Mr. Bredin had given notice of motion and the motion was put at the last meeting, with the argument that the board had obligated itself for the payment of \$5,000 in addition to the \$2,000 each which they agreed to turn over to the town as soon as the building of the project was completed.

The motion obligating the board to the payment of the sum of \$3,000 for the irrigation project was put through some considerable time ago. This motion was again read at the meeting. The motion stated that the board was obligated to turn over to the town for the payment of the irrigation system all monies received amounts up to the extent of \$3,000. Mr. Bredin contended that the \$2,000 obligation was meant to be in addition to the \$2,000 cash already promised.

Mr. McLean took issue with Mr. Bredin, contending that the \$2,000 obligation included the \$2,000 cash payment which the board was to pay as soon as the project was completed. Backing up his arguments with extracts from the minute book and by reading a portion of the town irrigation by-law, Mr. McLean gave a lengthy explanation of his side of the question. He contended that as the board had already paid to the town the sum of \$2,000, they still owed only a balance of \$200 to complete the \$2,000 obligation which was their undertaking, and he concluded his remarks with an amendment to Mr. Bredin's motion. The amendment was to the effect that the Board of Trade pay to the Town of Bassano the sum of \$200 in full payment of the board's obligation to the town in respect to the irrigation project.

A. P. Connolly sided with Mr. Bredin, and stated that the board was responsible for the irrigation project to the extent of \$5,000. A. G. Bond supported Mr. McLean, and contended that the evidence showed the board had gone on record as being obligated for only \$2,000. He stated, however, that should the irrigation project be in need of further assistance, he would be in favor of giving it. On a vote the amendment carried by a small majority.

Small Attendance
The attendance at the meeting was rather small, only about sixteen members being present. President H. P. Currie was in the chair. Some discussion occurred in regard to the best method of raising funds for the swimming pool. It was suggested that a subscription be taken up, and another suggestion was that money be raised by putting on a carnival and dance. It was finally decided that the board recommend the committee to put on a carnival and dance.

Money for Woods
The motion presented by H. W. Ford, that the board assist the town council in the destruction of weeds to the extent of contributing \$50 for this purpose, was carried.

Countess News

COUNTRESS, Sept. 25.—Dr. and Mrs. Armstrong and son Bob and Paul have been the guests of Mr. and Mrs. A. H. Anderson for the past week. Mrs. Marie Chamberlain, of Glen, is spending a few days with her sister, Mrs. Max Gamble, before leaving for Calgary Sunday where she attends normal school.

Mrs. Kate and Mrs. Elsie were afternoon visitors at the Gamble home on Monday.

Stella Barrows is threatening for G. Hogner, of Glen, this week.

A number of Helen Kell's friends were invited to her home on her 6th birthday. They enjoyed a most delightful afternoon. Dainty refreshments were served.

Mrs. Bonny Ferguson is assisting Mrs. Hildt, with her work during the week.

Mr. Dingley sold thirteen head of fat cattle during the past week.

SET NEW DATE FOR HUSSAR SCHOOL FAIR

Fair Will Be Held October 20th—Threshing Rigs are Busy

HUSSAR, Sept. 25.—The Hussar school fair has been postponed on account of the busy season, and now will be held on Thursday, October 26th. The management felt that many people could not leave their work to attend the fair which was to have been held on Wednesday of this week, September 25th. To make more possible a good attendance, the date was therefore postponed till the 26th of October.

Threshing, which was delayed over the week-end, was resumed Tuesday afternoon. Several farmers in the wintering Hills district still have wheat to cut.

Ben Austin, a former resident of this district, who now lives near Seattle, Washington, is visiting here. Eddie Stiles and his bride plan to return in a few days and will live in Mrs. Clifton's house, formerly occupied by Earl Ross.

Rev. Barton, who has been ill in the General Hospital, Calgary, is better, and church services will be held in the hall on Sunday evening, October 2nd.

Mr. Gardiner has charge of the drug store while Eddie Stiles is on his honeymoon.

Mrs. Robert Gunning, who has been visiting at the home of her son, George, left on Tuesday for Vancouver, Washington, where she will spend several weeks with other relatives.

Kenneth Howeman is assisting Ralph Armstrong in the wheat pool elevator during the harvest season.

Mrs. Hoyt, of Denmark, who has been visiting her sister, Mrs. Theodore Larkin, leaves this week for Calgary where she will attend the Garbutt Business College.

Mr. and Mrs. Frank Parley and Miss Myrtle Betty motored to Bassano on Tuesday evening.

Mr. and Mrs. Frank Beto and son Elwood were Calgary visitors this week.

Among the threshing outfits which started work this week are those of Oie Christensen, August Jensen, Roy Huler, J. V. Elliott, A. D. Williams, Keener and Joy Connolly.

The town has this week been burning some of the weeds in the vacant lots. The stuff is very dry and highly inflammable, and must be carefully watched.

WEATHER UNSETTLED FOR NEW RAILWAYS THRESHING OPERATIONS

Threshing Crops Work Between Showers—Heavy Yields are Reported and Grain is Grading High—Mostly No. 1 Northern

Heavily laden with golden wheat, the grain tanks are rattling; they lay over the dusty trails that lead from the grain fields to the elevators. All day long the stream of wagons rumbles along, each one carrying a little quota of grain that will fill all the broad baskets of the world. All day long the stream of threshing machines drives into the high elevators, dump their precious load, and return to the grain field for another load.

The work goes on from early morning till late at night, never ceasing except when the storm clouds hang low and rain soaks the stacks of grain. Rain is the bane of the threshing season, and has almost brought despair to the farmers this year.

Rate Stays, Threshing
Threshing was going with a full swing last week when Jupiter Pluvius suddenly descended on Bow Valley and drenched the grain fields in a soaking rain accompanied by a soft, wet snow, that melted almost as quickly as it fell. That brought a stop to the threshing operations of the week.

Following Monday's rain, the warm weather many outfits started up on Tuesday morning. A slight fall of moisture during Wednesday night made it tough going Thursday, and a few scattered showers that lasted only minutes, did not help the threshers, any except, perhaps, by clearing the opportunity of unhampering their tongues and expressing their opinions of the weather man. Some outfits ploughed along Thursday in spite of the tough going.

Yields are Very Good
Threshing operations have not been much more than well started in the Bassano district. The big portion of the crop is yet to be threshed, only about 15 to 20 per cent having been run through the separator.

As the threshing machine hums along all day the grain is clicked off by the beater as it passes through the machine. A tallying device keeps account of each bushel, and this little device tells a wonderful tale. It tells the tale of exceptional yields and little waste, running almost as high as 40 bushels to the acre.

The same sight that Playfair's car was stolen someone broke into W. B. Sambrook's garage, taking admittance through the back door. The robbers took several dollars' change from the till, but nothing else is missing.

Rob Garage Till
The same sight that Playfair's car was stolen someone broke into W. B. Sambrook's garage, taking admittance through the back door. The robbers took several dollars' change from the till, but nothing else is missing.

From field to elevator where to hand it is estimated that the wheat crop in the Bassano district will average more than forty bushels to the acre. As an example of how the yields are running, H. Kamp threshed 45 bushels to the acre; L. Kamp 40 bushels; J. F. King had a successful day's field sown on stubble that yielded 47 bushels to the acre. Mr. King has not finished threshing his other fields.

What is Good Grade
Most of the grain being threshed in the Bassano district is grading No. 1 Northern, with a little No. 2 coming in. It is weighing from 52 to 54 pounds to the bushel. The elevator men report they are plenty of No. 1.

Rye Crop Good
The rye is doing splendidly and yields of from 20 to 25 bushels to the acre are reported. The rye is grading No. 2 G.W., mostly without dockage.

AUTO THIEVES ABANDON CAR

Automotive thieves who stole the Chrysler sedan of W. B. Playfair Wednesday night, abandoned the machine on the road seven miles west of Glen.

Mr. Playfair keeps his car in a garage alongside his livery and feed barn near the C. P. R. station. On going down Thursday morning he found the lock on the garage door had been broken and the car stolen. Later in the day he learned there was a car in the ditch west of Glen, which turned out to be the stolen car.

Apparently the thieves skidded on the road, which was very muddy at this point, and when they could not get the machine back on the road they abandoned it.

Rob Garage Till
The same sight that Playfair's car was stolen someone broke into W. B. Sambrook's garage, taking admittance through the back door. The robbers took several dollars' change from the till, but nothing else is missing.

Laying Steel on Bow Slope Branch and Grading Rosemary Northerly Line

That the two new C. P. R. branch lines will be ready in time to handle the 1927 crop in the Gem and Bow Slope districts now seems highly probable. Grading is completed on the Bow Slope branch, and steel is being laid. The track laying crew of 20 men has gone right along for the past couple of weeks, and it is expected they will have the track completed to the end of the line by October 1st.

There will be three stations, with elevator tracks, on the Bow Slope line. One station at the N. W. quarter of section 25-16-16; one at Rainier, S. W. quarter of section 25-16-16, about a mile west of the Bow Slope station; and one at Rainier, N. E. quarter of section 13-16-15.

The ballasting has not been started, and it is not yet known whether or not ballasting will be done this fall.

Rosemary Northerly Line
The grading crews are still busy on the Rosemary Northerly branch. On the northern section of this line, grading, consisting of cuts, fills, and side hill grading. Practically all of it will be done by steam shovel.

The Gem Spur
The spur line which will branch off from the main branch and run in a westerly direction to tap the Gem Colony, is now being graded. It is expected the spur will run right in almost to the Gem store and post office, but whether it will be completed as far as that this fall seems to be a matter of uncertainty.

NOT MEETING
A meeting of boy scouts and those interested in the scout movement was held in the scout hall on Thursday evening of this week. M. J. Quinlan was reported to the position of scoutmaster, and A. G. Bond to the position of chairman of the scout association committee.

Gem News

Gem, Sept. 25th.—A pleasant time was enjoyed at the home of Miss M. Chamberlain, when a number of the young people in the colony surprised her and all had a most enjoyable time. The evening was spent playing games, musical selections and dancing. A dainty supper was served, bringing a very enjoyable time to a close.

Miss M. Chamberlain plans to enter Normal School at a later date.

Mr. and Mrs. Jahnson who have been visiting relatives here, left for their home in Medicine Hat, early in the week.

Miss Rahamam Parrot was a colony visitor last week. Spending a few days with her mother Mrs. Parrot.

Mr. G. Hepner finished threshing on Tuesday.

Ralph Robson plans to commence threshing operations, starting on the farm on Wednesday.

Mr. P. Gieseler had a pleasant party of friends on Wednesday last. Mrs. E. Small, with Mrs. L. Douglas and sister-in-law, Mrs. Douglas, and Mr. and Mrs. Millerville, and party were the callers. Mrs. Gieseler served afternoon tea and an enjoyable time was spent over the tea cups.

Mrs. Dalville and Barker are from the north to the colony, soon hunting.

Russian horse buyers are here again, having a number of horses in sight.

Mr. Miller of Millerville was a dinner guest on Wednesday last, at the home of Mrs. E. Small.

Mr. E. Selridge with Mrs. Miller were Thursday visitors of Mrs. P. Pollock.

C. P. R. camp in charge of P. O'Connor left the colony on Wednesday for the Lethbridge district. The carpenters are still with an repairing structures etc.

Mrs. Sparks returned home from the Bassano Hospital Monday evening.

McPharland, C. P. R. was a visitor in the colony on Sunday.

Mrs. Keckler and daughter, Gleda, spent a very pleasant Tuesday with Mr. and Mrs. John Royer.

Mrs. P. Murphy and nephew Bill were very welcome guests of Mr. and Mrs. T. L. Maguire.

Radiofans spent an interesting hour on Thursday, listening in on the big G. Hephner, as he plans to enter business, opening up in the butcher trade in Bassano.

HEAVY HAIL LOSS IN 1927
Worst in History of the Province—Bassano District Escapes

The season of 1927 has seen a tremendous hail loss in the province of Alberta. It is the heaviest loss ever in the history of the province, and amounts to the sum of a little less than \$2,600,000 on insured crops. This is a big increase over 1924 when the losses totalled only \$800,000.

The Bassano district escaped hail damage this year. Several times the danger threatened, but nothing came of it save a few small rains, which were harmless. Considerable damage was done in the Husar district, and Gem also suffered, and Rosemary and Countess got off with very little loss.

New Rates
The rates for hail insurance carried under the municipal plan for 1927 have now been set by the hail insurance board of Alberta.

The volume of business written shows an increase of almost 40 per cent compared with last year. 1,130,000 acres being insured in 1926 and 1,551,000 in 1927. There were 10,491 applications for insurance and more than 5,000 of these were claims.

Mr. Torvald stated that after giving practically all of the reserve fund built up in the past eight years the board will find it necessary to set rates in some portions of the province higher than ever before. The province was divided into six different classes of districts which for convenience are called A, B, C, D, E, and F. Class A has a rate of 10 per cent; Class B 16 per cent; Class C 18 per cent; Class D 8 per cent; Class E 6 per cent; and Class F 5 per cent.

Class A districts which are the most fertile are given a 10 per cent rate. Class B 16 per cent; Class C 18 per cent; Class D 8 per cent; Class E 6 per cent; and Class F 5 per cent.

Class A districts which are the most fertile are given a 10 per cent rate. Class B 16 per cent; Class C 18 per cent; Class D 8 per cent; Class E 6 per cent; and Class F 5 per cent.

PROSPECTS POOR FOR ALFALFA SEED YIELD

Unfavorable Conditions for Seed Alfalfa in Alberta and United States

(Brooks Bulletin)
It is clearly evident that the alfalfa seed crop of the Eastern Irrigation block is going to be extremely light. This condition, however, from various reports in hand, seems to also exist throughout a large portion of the United States and Eastern Canada.

Rapid City, South Dakota, reports the alfalfa seed crop at only 15 per cent of last year and the smallest crop in fifteen years.

Mr. W. J. Lennox, Dominion Government Seed Inspector for Western Ontario, who was a recent visitor in town, informed the manager of the Grinn Alfalfa Seed Growers' Association that the alfalfa seed crop in Ontario would be very light, and in Peel County which normally has a very heavy yield of seed, the crop this year would be about 7 per cent of last year's yield.

With the prospects for such a light yield of seed it is anticipated that the price will be much higher than the former years. Therefore it would be advisable for those having alfalfa seed crops that give promise of yielding even a fair crop, to give their attention to saving it.

GARLAND GIVES VIEWS ON COAL FREIGHT RATES

E. J. Garland, Progressive member for Bow River riding, has expressed views on a recent report at the recent findings of the Railway Commission on the Alberta-Ontario coal freight rates. Having attended every session of the Railway Board, and the Ontario Railway Commission, he recommended that the Alberta coal freight rates be kept at a low level, to determine what influenced the commission's recommendation.

Mr. Garland says the fight is not over. He has been asked to attend the Alberta and Ontario governments come together on a basis upon which they can approach the downtown government, he feels that the government of Canada will bend its energies toward a solution of larger home markets for Canadian coal.

The Ontario government has been asked to attend the Alberta and Ontario governments come together on a basis upon which they can approach the downtown government, he feels that the government of Canada will bend its energies toward a solution of larger home markets for Canadian coal.

Canada the Big Game Hunters' Paradise

Canada is still the finest big game country in North America. The vast stretches of forest and open country in the provinces of Nova Scotia, New Brunswick, Ontario, Quebec, and British Columbia—the latter two offering mountain deer, moose, and caribou—are the hunting grounds of the big game hunter. The Canadian Pacific Railway, which is easy access to the wild regions of the Yukon, Northwest Territories, and Alaska, offers the hunter a variety of big game. From the coast of British Columbia, the hunter can reach the interior of the province, and from there to the Yukon and Alaska. Plea is Made For Greater Use Here Of British Made Goods

At the annual meeting of the British Manufacturers' Association of Canada held at the Hotel Macdonald, Ottawa, on August 25, the following resolutions were adopted:

Resolved, That the Association of Canada hereby expresses its sincere appreciation to the British Government for the assistance rendered by it in the development of the Canadian economy.

Resolved, That the Association of Canada hereby expresses its sincere appreciation to the British Government for the assistance rendered by it in the development of the Canadian economy.

The most striking example of this was the \$20,000,000 worth of rubber for automobile tires that came to Canada through the United States and was sold at the same price as in the United States.

At the same time, the Canadian Government has established a tariff on rubber tires imported from the United States, which has resulted in a large increase in the price of rubber tires in Canada.

Mr. Malcolm's address was for the greater use of British made goods in Canada.

Speaking on immigration matters, Mr. Malcolm said it was not a wise policy to continue a method of selective immigration from the United States and Canada, but rather than to let the land with its resources to the detriment of native labor and industry.

The speaker, Mr. Malcolm, said that the Canadian Government has been too slow in its action to deal with the problem of immigration.

He said that the Canadian Government has been too slow in its action to deal with the problem of immigration.

Gene Tunney Retains Heavyweight Championship Of The World

Chicago.—Gene Tunney proved himself worthy of the heavyweight championship of the world by defeating Jack Dempsey in the 15th round, which they had fought for the title.

The battle, the greatest ring fight ever witnessed, was fought before a record crowd of nearly 100,000 persons, with receipts totaling \$2,500,000. The longest in recorded history. The champion in 29 minutes scored a knockout and the defeat of challenger \$100,000 for his come back try. These magnificent brawls have delighted fans far beyond the limits of the ring.

Reaction to the dust of the canvas by a terrific fall in the seventh round, Gene suddenly got up and made a comeback to bring his dangerous opponent.

Knocking and bruising, Jack Dempsey reached the end of his career in the ring when he could not fight any more.

Impressed With "Iron Chancellor"

Grandson Of Famous "Iron Chancellor" Paying Visit To Dominion.

Ottawa.—Count Gottfried Von Bismarck, a tall, blonde, bookish young German, whose grandfather, Prince Otto Edward Leopold Von Bismarck, was the famous "Iron Chancellor," arrived in Ottawa from Canada to spend the next few days in the capital. Count Bismarck is interested particularly in agriculture and he visited the Dominion Experimental farm here.

The young count has seen some of the best of the Canadian wheat, as from Winnipeg he visited the Manitoba wheat fields. He said he had been greatly interested in the operations of the Canadian wheat industry.

He visited the Winnipeg Grain Exchange. He was impressed above all with the extent to which wheat is grown in the west, and the fact that it is sold in Germany, where farms were smaller and labor was expensive.

Receives Higher Wages

Berlin.—Misses at the British Embassy in Berlin are considering paying their chauffeurs, who are paid more than the married men, at a conference in the foreign office regarding a nation-wide increase in wages. The minority report asked higher wages for chauffeurs because living is more expensive for them, as they have no wives to support and spend more on their automobiles.

Protest Tariff Change

Manufacturers of Cutlery and Buggies Object To Reduction In Duty

Ottawa.—Manufacturers of cutlery and buggies protested to the tariff board against the application of the new tariff for a reduction of the duty on these articles. The manufacturers asked that the present duty be retained and that the same be levied on the new goods. The tariff board has decided to reduce the duty on cutlery from 15 to 10 per cent and on buggies from 15 to 10 per cent.

U.S. Ambassador To Mexico

Washington.—Dwight W. Morrow, the New York banker, has been selected by President Coolidge to be ambassador to Mexico. The Mexican Government has obtained the Mexican Government's sanction of the selection.

CONGRATULATE CARRY ON FOR ANOTHER YEAR

Dublin.—President Cosgrave's Free State government, despite the disappointing outcome of the parliamentary elections, intends to carry on with the expectation of at least a year of life. In making this announcement, Mr. Cosgrave said that he was confident that the government would be able to carry on for another year.

League May Meet In Ottawa

Canada Planning To Invite Council To Meet Here

Ottawa.—Canada, recently elected to a non-permanent seat on the council of the League of Nations, is reported to be planning to invite the council to meet in Ottawa. In fact there is a projected scheme to have the council meet in Ottawa.

Silk Train Wrecked

Valuable Cargo Tumbled Down Embankment Near Train Leaves Rail

Vancouver.—A silk train valued at \$250,000 was lying in the Fraser River when the train derailed, and the cargo tumbled down the embankment. The train was carrying a large quantity of silk.

Canada's Auto Production

August Increase Fifteen Per Cent

Ottawa.—Production of automobiles in Canada during August totaled 32,536 cars, an increase of 15 per cent over the output of 28,311 in July, which was the lowest month this year, but 18 per cent under the 38,931 cars reported for August of a year ago.

Baldwin Sees Whaler in Action

Premier Baldwin's bird's eye view of the whaling industry did not end as the Canadian Pacific liner of Scotland steamed out of the harbor of North Sydney recently to the whaling grounds.

Wheat Pool and Prices

Pool Will Not Be Used To Boost Prices To the Consumer

Ottawa.—There was no cause for alarm or reason to expect that the farmers would use the wheat pool to boost the price of wheat. The pool was established for the purpose of stabilizing the price of wheat.

Three-Motor Plane Ready For Flight

Will Leave North Sea Island On Trans-Atlantic Trip

Berlin.—Despite "vaporish" details by officers of the German Air Force, it was learned from an unimpeachable source that the G-24, a three-motor plane, had been ready for flight since the middle of the month.

Plan To Locate All Doukhobors In Single Colony In The West

Winnipeg.—A plan which has its ultimate goal the concentration of all Doukhobors in a single colony in Western Canada, is being discussed by the Canadian Government.

Will Attend Convention

Manitoba's Progressives Will Attend Convention

Manitoba's Progressives will attend the convention of the Manitoba Progressive Association, which will be held in Winnipeg. The convention will be held in Winnipeg.

Convict in English Prison Betrays Himself By Hate

London.—A convict who attempted to escape from Farnham prison in England, was captured by the police. The convict was found guilty of a crime.

Mission School Tragedy

Grey Nuns, Sister and Nineteen Children Perish in Fire

St. Mary's.—A fire broke out in the mission school at St. Mary's, and the Grey Nuns, Sister and nineteen children perished in the fire.

To Set Slaves Free

New Ruling Gives Liberty To Slaves

London.—A new ruling will be introduced in the legislative council of Sierra Leone, British protectorate on the west coast of Africa, which will have the effect of setting free all the slaves in the protectorate.

British Politician Dead

Lord George Hamilton Was Once First Lord Of Admiralty

London.—Lord George Hamilton, former first lord of the Admiralty, died at his London residence, aged 81.

SOVIETS CAUSE STRONG PROTEST FROM FRANCE

Paris.—The storm which has been hovering over the head of Christian Rakovsky, Soviet foreign minister, has burst at last. Mr. Rakovsky has been accused of causing a strong protest from France.

PROHIBITION ACTIVITY

Domestic Officers Meet Provincial
Executive

By A. M. Stephen
O mad wind,
Glad wind,
That sweeps the purple plumes
Of nodding asters, row on row,
In late September's afterglow,
My heart has heard you call!
O mad wind,
Glad wind,
My feet would roam with you
The wilder paths of tangled fern
Where bright the scarlet berries
burn.
O mad wind,
Glad wind,
Come, huckle up the sun
That leaves a radiance rare and
pale
In golden-rod along the trail
Upon the misted hills.
O mad wind,
Glad wind,
This fire is of your kin
That flames in crimson splendor
across
Fleet Autumn glides with unbound
hair
Along your woodland ways.
O mad wind,
Glad wind,
She in your breath in form
The music of her light steps borne
Triumphal marches low and sweet
Of life fulfilled by love.

Two meetings will be held in Al-
berta, on Saturday, October 8th
these two gentlemen will meet with
the members of the Provincial Exe-
cutive for the northern part of the
Prohibition of Canada, with head
quarters at Toronto, and Dr. Dan
McLachlan, general secretary of the
Board of Evangelism and Social Ser-
vice of the United Church of Canada,
and a member of the executive and
sub-committee of the Prohibition Fed-
eration, will visit the four western
provinces in October to consult with
the provincial executive of the differ-
ent prohibition associations with a
view to securing closer co-operation
of all Temperance Organizations in a
future policy on Temperance educa-
tion along scientific lines and also a
more moderate policy as to future Pro-
hibition Legislation.

TO BUILD CANNING PLANT
IN EDMONTON

A site for a canning factory has
been purchased in Edmonton by the
Brother Canning Company, of New
Westminster, B. C., and an early
start will be made with the erection
of a plant, which will can Alberta
grows fruits and vegetables.

NOBLE GROWS BIG CROP

LESTERBRIDGE—A new world re-
cord for winter wheat production
seems likely on the farm of C. S.
Noble, of Nobleford, Alberta, with
Kharkov 22 M.C., a wheat developed
at MacDonald College, near Montreal.
While but 240 acres of a 1,300 acre
field of this wheat has been threshed
and weighed in at the elevator, the
wheat had rated 57 bushels to the
acre, and this section, the poorest of
the field in the winter record crop set
by the same field in 1914, yielded at
that time but 42 bushels to the acre.
White high yields on small fields are
common, this 1,300 acre field looks
like a world record.

THE BASSANO MAIL

Wallace J. Smith
Editor and Publisher

Subscription \$2.00 a year, \$2.50 to the
United States

We are told that the prices of shoes
are going up. Probably following the
shirts.

They say Ford's new car will travel
sixty miles an hour. What chance
will the poor pedestrian have now?

Our little show "Harry was not so
bad." They had snow in Colorado
and Wyoming this week.

In these days of short skirts the
profligate might want to get the fast
cat, but he never exhibits any desire
to kill it.

Scientists have confirmed the view
that the sun will last another hun-
dred and fifty million centuries. Well,
that's something we won't have to
worry about for awhile.

Henry Ford is a long time in com-
ing out with his new car, but if the
Alberta government would announce
a new highway improvement policy
perhaps Ford would be able to de-
cide what his new bus would be like.

A Gypsy girl four times tried to
commit suicide in Detroit by throw-
ing herself in front of automobiles,
but each time the driver, dodged the
girl. Aren't these motorists crazy?

THE ORIGIN
OF MAN

Did man originate from a more
humble form of life, such as an ape
like creature, or is he an act of
special creation? That is the ques-
tion which has been commanding the
serious attention of thinking men for
the past fifty years or more, and has
recently stirred up another contro-
versy on the subject in England.

Charles Darwin, the famous English
anthropologist, was the first to pub-
lish a book on the origin of man.
Darwin's book appeared in 1871, and
later, in 1874, Bruce Huxley pub-
lished "The Evolution of Man," which
added further evidence in support of
Darwin's beliefs. The Christian
church has been opposed to Darwin,
not being able to reconcile his line
of reasoning with the creation of
man as it is given in the bible, but
recently Dr. E. W. Barnes, Bishop of
Birmingham, created consternation
in the ranks of the theologians when
he preached a sermon in which he
sided with the teachings of Darwin.
And now the battle is on, the modern
ist ministers on the one side support-
ing Darwin, and the fundamentalists
on the other clinging desperately to
the fast crumbling stronghold of the
old church dogmas.

Darwin's contentions first met
with bitter denunciation and ridicule
not only by the church, but also by
some of his fellow scientists. Later,
as the revealing light of truth burned
stronger and brighter, Darwin's
teachings were accepted by many of
science, and the unanimous re-
sistance of the church was weakened
by the winning over to Darwin's side
of some of his early opponents in
the church. Today we are witness-
ing the remarkable spectacle of
many more ministers throwing over-
board the old belief in special crea-
tion and supporting the Darwinian
doctrine that man evolved from a
lower form of life and through the
long ages has gradually lifted himself
up to what he is today.

Darwin's assertion that man has
sprung from an apelike animal has
sounded the test of time. Fresh evi-
dence brought to light in recent
years may have altered in some small
degree the early Darwinian plan,
but the sturdy structure is still there,
and has been made larger and strong-
er with each additional bit of evi-
dence.

Fifty years ago it was rather a
bold person who would stand up and
declare science was right. Today it
requires a small amount of courage
to say Darwin was wrong, at least,
seriously wrong. The force of
Darwin's reasoning has been gradu-
ally accepted in the world of science,
and has penetrated even into the
innermost recesses of the church.

That there should be conflict be-
tween science and religion is a mis-
fortune, and the cause of much bitter-
ness. There should be no conflict
between the two. Science deals
with the world of matter, and ven-
ilation with the spiritual world.
The bible is not a record of careful
scientific investigation and discovery.
It does not set forth an explanation
of the origin of man by presenting
a reasonable line of argument backed
up by material facts. The bible is
not meant for, and cannot be accept-
ed as material history in this regard.

It treats of emotion and feeling; of
the soul and the spirit, that elusive
something which comes from you
know-when and goes we know
not whither.

Scientific investigators have un-
earthed a mass of material facts that
form a chain of evidence by which
man traces his origin back to the
remote ages when he lived by the
strength of his fangs and claws, the
slow of his undeveloped mind. Al-
though the chain is not complete,
there are broken links and unexplained
lacunae where evidence ceases, and
the seeker after truth is left groping
in the dark, yet the evidence that is
before us points a steady and un-
wavering finger back toward that
rough and broken trail by which
man has ascended from an uncouth,
hairly, wild creature, to his present
day degree of development.

There is no other explanation of
man's origin which can be enter-
tained in the pure light of truth.
There is no other explanation based
on facts and reason. Many of
us would like to believe that man is
an act of special creation; that he
was made in the image of God. But
there is no foundation for this be-
lief except our own personal vanity
and egotism. Faced with a mass
of scientific evidence which is al-
most daily piling up against us, more
pieces in the jig saw puzzle of man's
history, we are forced to believe
that man is not an act of special
creation, but is a product of evolu-
tion.

Science does not refute God.
Science is in search of truth, and
when it finds that truth it accepts
the facts even though they upset pre-
vailing theories and long cherished beliefs.
Nothing that science has yet dis-
covered throws a shadow on the be-
lief that there is a supreme being,
a divine hand, guiding the destinies
of the universe.

ALBERTA EXHIBITS APPEAL
TO AMERICAN FARMERS

Keen interest in Alberta on the
part of farmers in the middle-western
states and prospects for quite an
influx of very desirable settlers from
that territory are reported by pub-
licity commissioner D. A. McCallum.
McCallum has returned from a trip through
Iowa, Nebraska, Missouri, Illinois,
and Minnesota. The exhibit of Al-
berta's agricultural products which
was shown at a number of fairs
throughout this region made a strong
appeal to farmers, and Alberta's
cheap farm lands, low tax rate and
heavy crops, are proving strong mag-
nets to many who are farming under
the serious economic handicaps ex-
isting in this part of the United
States.

BASSANO

McClary's FURNACETTE

Looks like a handsome piece of furniture
but it's a most efficient Heating Plant

NOT A CONVERTED
COAL STOVE, BUT A
COMPLETE, POWERFUL,
SCIENTIFICALLY
DESIGNED WARM
AIR HEATER

Here, at last, is comfort
combined with beauty—a
genuine warm air heating
system enclosed in a hand-
some, porcelain enameled,
mahogany finished, all steel
cabinet—an attractive ad-
dition to any living space—
needing no register holes to
mar the floor.

The Furnacette burns less
fuel than the most efficient
heating stove, and circulates,
considerably more warm air
than the largest size base
burner.

The Furnacette operates
like a pipeless furnace. An
ordinary coal stove throws
out quick heat in a limited
distance. Here is a heat-
ing plant that lifts cold air
from the floor, draws it in
at the bottom, and on each
side, heats it, humbly lifts it,
and then circulates it—not
into one room only, but all
over the house.

While the Furnacette is
as economical on fuel as the
ordinary heating stove, it
will provide heat for four
or five times the area—
because it circulates heat
instead of radiating it.

With the Furnacette in
your home you have all the
advantages of warm air
heating at minimum cost.

JACK TORGAN

GROCERIA and MEN'S WEAR

WHO LOWERED THE COST OF LIVING FOR THIS DISTRICT

Local News

A son was born to Mr. and Mrs.
L. Kamp, of Bassano, in the local
hospital on Friday, Sept. 28th.

Mrs. Wallace Planagan and little
daughter are visiting at the home of
Mrs. E. A. Planagan, near Hildrop.

Mr. and Mrs. J. L. Torgan were
guests of Mr. and Mrs. J. Wallace
at the White Farm on Sunday.

The next sitting of the district
court in Bassano will be on October
29th, Judge Macdonald, of Calgary,
presiding. There will be three civil
actions for trial, and two applica-
tions for naturalization to come up
for hearing.

R. C. services will be held in
Bassano next Sunday morning at
9 o'clock.

Currie & Milroy have installed
two new underground tanks in front
of their store. The tanks have a
capacity of a thousand gallons each,
and one will be used for gasoline
and the other for tractor petrol. They
will sell the products of the Maple
Leaf Oil and Refining Co. of Cuttist,
Alta. A new gasoline pump has
also been installed.

Pancy Bartlett, pears, \$2.50, at
Jack Torgan's.

WOMEN'S INSTITUTE

The annual conference of the Bow
Valley Women's Institute was held
in Patricia last Tuesday afternoon,
September 27th. Bassano members
who attended the meeting were:
Mrs. C. W. Hayes, Mrs. P. Gifford,
Mrs. H. S. Johnson, Mrs. Sandra
Horvick, Mrs. A. O. Thomson, Mrs.
Chas. Hopkins, and Mrs. W. S.
Clark.

The ladies report the conference
was a very successful affair. Mrs.
H. S. Johnson was elected constitu-
ency convener for next year. The
next conference will be held in
Bassano.

Bebe Daniels in
Colorful New
Story, "Seniorita"

"Seniorita" Post Moving Drama of
Romance and Adventure

Coming to the Gem Theatre, Friday
and Saturday, this week, Sept. 29th
and October 1st, is Bebe Daniels' new
set Paramount picture, "Seniorita"
in which Miss Daniels is presented in
an entirely new type of role. In this
colorful story of romance and adventure
in South America, the fascinating
Bebe Daniels of "The Campus
Flirt" and "A Kiss in a Taxi" ap-
pears in the character of a dashing
caballero, a swashbuckling, high-
spirited, hot-tempered son of the
pumpkin. The masculine characteri-
zation is by a masquerade, however,
a masquerade that leads her into all
sorts of adventures and many amus-
ing situations out of all of which she
triumphantly emerges in true Daniels
style.

Playing opposite Miss Daniels is
James Hall, her leading man of "The
Campus Flirt" and "A Kiss in a Taxi".
It is one of the interesting
twists of the story that James Hall
in his role as Roger Oliveros meets
her only in her rare moments of com-
plete femininity in the picture. Wil-
liam Powell, the smooth suave villain
of society dramas, appears in a swag-
gering role that is said to present
him in an unusually interesting light.
Others in the cast are Josef Swickard,
Joan Standing, George Ovey and
Grays Whitman.

EDUCATION

Miss Mary R. Cathro, hono-
rary, Trinity College, London, England,
will take a few pupils, ages under 14
years, for \$10 per lesson, 10 lessons
\$2.00. McKee's Apartments.
